IAC Ch 63, p.1

## **645—63.1(157) Definitions.** For purposes of these rules, the following definitions shall apply:

"Disinfectant" means an agent intended to destroy or irreversibly inactivate specific viruses, bacteria, or pathogenic fungi, but not necessarily their spores, on inanimate surfaces.

"Disinfection" means the procedure that kills pathogenic microorganisms, but not necessarily their spores.

"Dispensary" means a separate area to be used for storing and dispensing of supplies and sanitizing of all implements.

"FDA" means the federal Food and Drug Administration.

"Germicide" means an agent that destroys germs.

"Sanitization" means the procedure that reduces the level of microbial contamination so that the item or surface is considered safe.

"School" means a school of cosmetology arts and sciences.

"Sterilization" means the procedure that kills all microorganisms, including their spores.

"Universal precautions" means practices consistently used to prevent exposure to blood-borne pathogens and the transmission of disease.
